

Fiscal Benefit-Cost Model

CUSTOMIZED

The CEDBR cost benefit analysis uses the actual tax structure for the state, county, city, and school district for the project being analyzed.

COMPREHENSIVE

The analysis includes the benefits from construction, sales, purchases, employment and visitors.

CLEAR ANALYTICS, INCLUDING:

- how the benefit-cost ratio develops over time to each taxing jurisdiction
- how the value of benefits accumulates over time, including short term construction impacts and long term economic impacts
- what is driving the benefits in your area
- use of a Model that is approved by the Kansas Court of Tax Appeals

A History of Quality Research and Service

CEDBR was established in 1968.
The CEDBR Cost-Benefit Model
was developed in 2005.
