

## Demographic Profile of Wichita Unemployment Insurance Beneficiaries Q3 2015

The Bureau of Labor Statistics defines an unemployed person as one 16 years and older having no employment and having made specific efforts to find employment in the past four weeks. By this definition, there was an average of 15,452 unemployed people in the Wichita metropolitan area in the third quarter of 2015, approximately 40 percent of whom collected unemployment insurance benefits.<sup>1</sup> In the third quarter of 2015 there were approximately 6,164 people, age 16 and over, who collected unemployment insurance benefits. That is a decrease of approximately 40 percent from the second quarter of 2015.

Educational attainment is a leading indicator of unemployment. The higher the level of education, the less likely a person will be unemployed. In the Wichita area 30.8 percent of the labor force, age 25 to 64, have no more education than a high school diploma. Of those receiving unemployment benefits, 57.4 percent have no more education than a high school diploma.

Between the second and third quarters of 2015, the number of unemployment beneficiaries in Wichita at all levels of educational attainment decreased. The largest level decrease was in those beneficiaries with a high school diploma and some college. The largest percent decrease was in those beneficiaries with a bachelor's degree or higher.

<sup>1</sup> The Kansas Department of Labor provided detailed unemployment beneficiary demographic data for third quarter 2015 at the county level, which was aggregated to the Wichita MSA.

### Educational Attainment Wichita MSA\*

### Gender

In the third quarter, a person in the Wichita area receiving unemployment insurance benefits is 1.6 times more likely to be male as female. This is up from 1.4 times more likely to be a male than a female in the second quarter of 2015. This shift can be attributed to seasonal adjustments in education and construction employment.

## Age

The age distribution of people receiving unemployment benefits remained approximately the same between the second and third quarters of 2015. There are marginally more people 45 and over receiving unemployment benefits, 39.4 percent, up from 38.9 percent in the second quarter.

As would be expected, the majority of people receiving unemployment benefits are in the working age population between 25 and 64 years old. Younger working adults, between 25 and 44 years old, are more likely to be receiving unemployment benefits than older working adults, between 45 and 64 years old, at 60.6 percent and 39.4 percent, respectively. <sup>2</sup>

<sup>2</sup> It should be noted that it is possible a significant portion of the unemployed not receiving benefits would be younger adults. The Census Bureau estimates the unemployment rate for 16 to 19 year olds in the Wichita area to be 29.0 percent, and 13.7 percent for 20 to 24 year olds. American Community Survey 2009-2013 5-year estimates

Wichita MSA Unemployment Insurance Beneficiaries by Age and Education 16 years and over					
	16 to 24	25 to 44	45 to 64	65 and over	Total
Less than high school	1.8%	5.3%	3.7%	0.2%	11.0%

Bachelor's degree or higher	0.4%	5.0%	5.4%	0.4%	11.1%
Not Reported	0.2%	0.6%	0.5%	0.0%	1.3%
<b>Total</b>	<b>12.2%</b>	<b>48.4%</b>	<b>36.7%</b>	<b>2.6%</b>	<b>100.0%</b>

Source: Kansas Department of Labor. Totals may not sum due to rounding.

However, age is not a strong indicator of who is likely to be a beneficiary of unemployment insurance in the Wichita labor force. The age distribution of people receiving unemployment insurance closely resembles the age distribution in the labor force. For all age groups, the number of people receiving unemployment benefits decreases with higher levels of educational attainment.

## Race

A person receiving unemployment benefits in the Wichita area is 2.6 times more likely to be white than of a minority race. However, there is a disproportionately higher level of minority workers receiving unemployment benefits when compared to the labor force in the Wichita area. Minority workers account for 14.2 percent of the labor force and 28.1 percent of unemployment insurance beneficiaries. For all races, the number of people receiving unemployment benefits decreased with higher levels of

educational attainment. Between the second and third quarters there was little change in the racial mix of persons receiving unemployment insurance.
