

WSU Wichita Metropolitan Area Indices

July 2017

The Center for Economic Development and Business Research has compiled the current and leading indices to provide insights into the present and future state of the Wichita economy. The WSU Current Conditions Index is designed to give an indication of the present conditions of the Wichita metropolitan area economy. The WSU Leading Economic Indicators Index is designed to give an indication of where the Wichita economy is headed over the next six months.

WSU Indices of Economic Activity

WSU Current Index of Economic Activity

The current index declined somewhat after improvements through the spring. The current level of economic activity, in Wichita, is slightly above the 2016 level. The deterioration can be attributed to a decrease in total non-farm employment. That deterioration was somewhat offset by small improvements in the unemployment rate and the hours and earnings of production workers.

WSU Leading Index of Economic Activity

The leading index indicates a small decrease in economic activity into the fall, from current levels, after showing improvement through the spring. This would put the level of economic activity slightly above 2016 levels through the end of 2017. This can be attributed to deteriorations in the Aircraft Production Index and the Kansas Leading Index.
