

## WSU Wichita Metropolitan Area Indices

September 2017

The Center for Economic Development and Business Research has compiled the current and leading indices to provide insights into the present and future state of the Wichita economy. The WSU Current Conditions Index is designed to give an indication of the present conditions of the Wichita metropolitan area economy. The WSU Leading Economic Indicators Index is designed to give an indication of where the Wichita economy is headed over the next six months.

**WSU Indices of Economic Activity**

## WSU Current Index of Economic Activity

The current index was flat between June and July after declining in the late spring. The current level of economic activity, in Wichita, remains slightly above the 2016 level. The improvement in total non-farm income was offset by deteriorations in the other index components.

## WSU Leading Index of Economic Activity

The leading index continues to indicate a small decrease in economic activity into the fall, from current levels, after showing improvement through the spring. However, the July index indicates a larger decrease than June. This can be attributed to decreases in the Aircraft Production Index and the Kansas Leading Index. This would put the level of economic activity slightly above 2016 levels through the end of 2017.
